

Backflow Prevention Assembly Tester Course Great Falls

February 12 - 17 2018

Course Instructor:

Ray Hedglin is retired from the city of Bozeman's distribution department where he worked for over 25 years. He's been a part of METC's backflow prevention program since 1993. Ray is an ABPA certified backflow prevention assembly tester and cross connection control specialist.

Course Description:

A series of lectures followed by guided exercises in a wet lab will provide understanding of field testing methods on 4 backflow prevention assemblies: pressure vacuum breakers, spill resistant vacuum breakers, reduced pressure principle assemblies, and double check assemblies. Students will gain knowledge in hydraulics, backflow and backsiphonage, types of cross connections, and degrees of hazard and state and federal regulations. Friday afternoon participants can take a written exam and on Saturday morning can take a practical exam administered by the American Backflow Prevention Association (ABPA). Passing scores on both the exams will result in certification by ABPA as a backflow prevention assembly tester. For more information on ABPA see the back of this training announcement or go to their website www.abpa.org.

ABPA Certification Program:

The American Backflow Prevention Association's Certification Program, recognized by the state of Montana, assists the administrative authority in assuring that backflow prevention assembly testers are receiving proper training and can demonstrate their understanding of that training in a validated examination process. When a tester successfully completes a written and practical exam ABPA awards a certificate. Testers can present the certificate to employers to demonstrate their understanding of backflow prevention and cross-connection control and the ability to perform a field test of a backflow prevention assembly.

COURSE MATERIALS: Course materials will be mailed by January 19, 2018. The USC FCCCHR Manual of Cross-Connection Control 10th Edition and the Montana Backflow Prevention Assembly Testers Manual are used for this course. **Those recertifying should already have these manuals and must bring them to class.** If you no longer have these manuals the fee is \$100 for a set.

This course is approved by the Montana Office of Public Instruction Veterans Education as a Non-Accredited Education Program. Veterans can use their VA Education and Training benefits for this course. Please contact Barb Coffman at METC (406-781-2298) to find out how to apply your VA benefits to this course.

★ ★ ★ ★ ★
DAY 1: Monday, February 12, 2018

9:00 am Registration
9:30 am - 4:30pm

- Lecture
- Status of State Program
- Responsibility, Liability, and Authority for Prevention
- Hydraulics & Test Kits
- Connections & Unapproved Devices
- Special Application Devices
- Cross Connection Control

DAY 2: Tuesday, February 13, 2018

8:00 am - 4:30pm

- Reduced Pressure Principle Assemblies (RP)
- Double Check Assemblies (DC)
- Associated Hydraulics & Maintenance & Repair
- Lab/Diagnostics/Troubleshooting

DAY 3: Wednesday, February 14, 2018

8:00 am - 4:30pm

- Pressure Vacuum Breakers (PVB)
- Spill Resistant Vacuum Breakers (SVB)
- Atmospheric Vacuum Breakers (AVB)
- Associated Hydraulics & Maintenance & Repair
- Lab/Diagnostics/Troubleshooting

DAY 4: Thursday, February 15, 2018

8:00 am - 4:30pm

- Reduced Pressure Principle Assemblies (RP)
- Double Check Assemblies (DC)
- Pressure Vacuum Breakers (PVB)
- Spill Resistant Vacuum Breakers (SVB)
- Lab/Diagnostics/Troubleshooting
- Practice Exam

DAY 5: Friday, February 16, 2018

8:00 am - Noon

- Lecture Review & Lab Testing
- 1:00 - 5:00 PM
- ABPA Written Exam only for New and Recerts

DAY 6: Saturday, February 17, 2018

8:00 am

- ABPA Practical Exam Only for New and Recerts
