

Bringing Biodiesel Education to Havre High

The Bio-Energy Center hosted Havre High School's Automotive Tech Class taught by Merle Hoerner. Center staff, Jon Soriano, delivered a pre-lab discussion Tuesday at the high school followed by two class periods of a hands-on experiment at the Center on Wednesday and Thursday. The Center staff trained the senior students on how to prepare biodiesel in lab scale. Staff also provided the students a tour of the Center's facilities and an opportunity to see biodiesel being produced at the Biodiesel Pilot Plant housed in the old auto-diagnostic building. The students will be back next week to test the biodiesel that they made.

Energy Saving Tip #17

If you have a window which receives direct sunlight you might want to adjust your blinds in the summer so that you do not lose cooled air.

Web Browser Presentation Mode

Even with your web browser maximized a lot of space at the top and bottom of a browser screen is taken up by toolbars, menus, and status bars. If you are giving a presentation, or are just feeling cramped while browsing websites, switch to presentation mode to view websites in more space.

In Firefox and Internet Explorer, presentation mode will autohide the toolbars, etc, but you can bring them back at any time by hovering your mouse at the top edge of the screen.

To enter presentation mode, push the **F11** function key (the function keys are usually located at the top of your keyboard). To toggle back to the normal viewing mode, simply push the **F11** function key again.
