

**MONTANA STATE UNIVERSITY  
NORTHERN**

---

## **Nursing**

Currently the Department of Nursing at MSU-Northern is working to determine if the current nursing curriculum used in the Associate of Science in Nursing (ASN) will meet requirements for licensure by examination (NCLEX-RN) in states outside of Montana. The list will be updated as we determine requirements from each state within the United States. The State of Montana is one of 35 states that is listed in the Nurse Licensure Compact (NLC). If students want to initially license in a state other than Montana these links below will help with information.

The following link will help assist students to ensure they choose a program that is right for their needs, as we update our list:
