THE VALUE OF YOUR BIOLOGY DEGREE

A biology degree from Montana State University-Northern provides a strong foundation in biological principles with an emphasis on molecular biology and biochemistry. The biology program offers a comprehensive undergraduate experience that will prepare you for graduate school or a career in the health sciences.

With advances in medical practice and technology, biology careers are expected to grow considerably in the next 10-20 years. The Bureau of Labor Statistics separates biology occupations into a number of specific careers, but the majority are expected to grow at average or above-average rates, with a few particular disciplines booming. Those include: epidemiology, medical science, biochemistry, and biophysics. Graduates of MSU-Northern's biology program

WANT TO GRADUATE ON TIME? SAVE MONEY? GET BETTER GRADES?

15

You're going to need 15. That's the number of credits you need to take each semester to graduate on time. Sure, you can take less and still receive some scholarships and funding. But unless you take 15 credits a semester (or 30 a year), you're looking at an extra year or more in order to graduate. Know the courses you need to graduate, and meet with your advisor to map out a plan to earn your degree on time.
